

ECLIPSE II

88

First secure the chosen mounting base to the desired wall, ceiling, pole or bulkhead. Mains cables can now be easily terminated into the base using the required cable glands to maintain the IP sealing.

Once the base is secure, hang the main body via the hook on the base. This will remain suspended leaving your hands free to complete the connections to the terminal block.

The main body can now be swung into place and secured using a screwdriver or nut driver. The terminal chamber is now sealed.

The Eclipse II incorporates unique features designed to make installation and maintenance quicker and easier. The lamp chamber utilises the restricted breathing Ex nR concept and lamp access is by means of the screwed cover glass, whilst the control gear area is separated from the lamp chamber by a barrier and is non sparking Ex nA, meaning that no special cable glands are required.

The luminaire makes use of the Swing-Barrel Nut System. This allows users to easily install the mounting base first and complete the mains wiring without the need to support the body and lamps during installation. This simple design saves on both time and labour costs during installation and maintenance activities. The Swing-Barrel Nut System can be tightened with an ordinary screwdriver or nut driver without the need for special tools.

The main body of the Eclipse II also features a built in external attachment point, this allows the luminaire to be secured using a secondary safety cable.

Now safely screw the appropriate lamp into the body.

Finally attach the unique threaded lamp glass and turn until a secure seal is achieved.

The Eclipse II wellglass has been designed to make installation quick and simple. The lamp and gear chambers are separated for easy maintenance and require no special cable glands.

The luminaire also features a swing barrel nut system. This allows prior installation and wiring of the mounting base without the need to support the body and lamps. This unique design saves on both time and labour costs.

The Eclipse II with external reflector

The Eclipse II with glass refractor

Standard Specification

Features

Type of Protection	Ex nA nR(Non Sparking Restricted Breathing)
ATEX Classification	Group II Category 3 G
Area Classification	Zone 2 areas to EN 60079-10-1 and EN 60079-10-1 with installation to EN 60079-14
Certificate	Type Examination Certificate Baseefa04ATEX0393X
Coding	Ⓔ II 3 G Ex nA R II Refer to table for T class and Ambient
Enclosure	Painted aluminium body with glass globe. Silicone rubber gasket. Single stainless steel barrel nut fastener.
Entry	Up to 4 x M20 cable entries
Termination	3 core 6mm ² max. With looping.
Lamp Type	Ceiling mounting
Windage	0.107m" (up to 150W Glass) 0.134m" (> 150W Glass) 0.210m" (Enclosed Reflector)
Control Gear	Internal copper/iron ballast with ignitor and PFC correction capacitors.
Relamping	Access via restricted breathing lamp chamber
Burning Position	Up to 25° off vertical
Ingress Protection	IP66 to EN 60529
Electrical Supply	220, 230, 240V 50Hz (50, 80, 100 & 125W) 220, 230, 240, 254V 50Hz (70, 150, 250 & 400W)

Easy access for wiring and control gear
Unrestricted breathing gear enclosure removes the need for special glands or cable
Corrosion resistant
High, medium and low bay lighting
Excellent light distribution
Suitable for a wide range of ambient temperatures from -45°C to +55°C, dependant on lamp type and wattage
Option available for Zone 22 combustible dust environments

International Approvals

ATEX and GOST

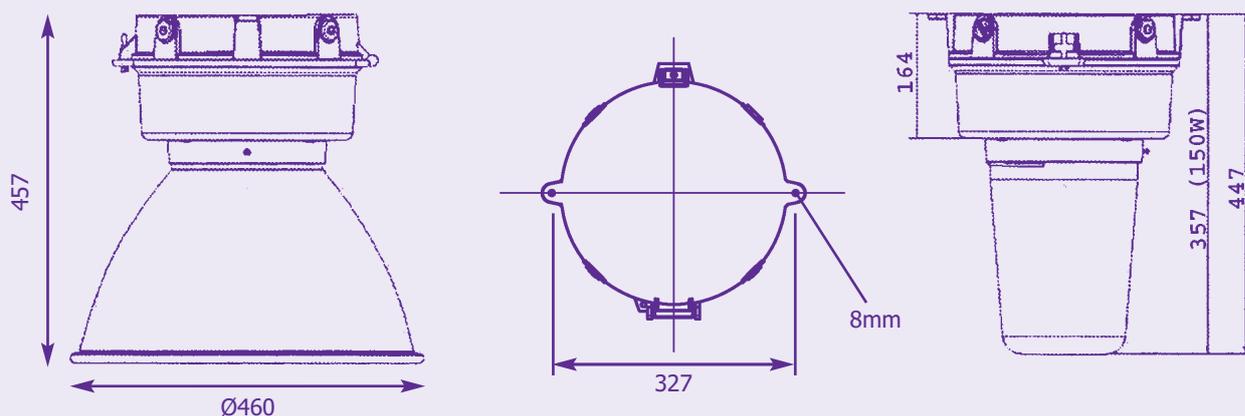

IECEx Compliant

ECLIPSE JUNIOR Ex n WELL-GLASS

92

The Eclipse Junior is a compact wellglass that incorporates the low maintenance features of the Eclipse II. Its low profile design and range of mounting options, offers an all round lighting solution in areas of limited space.

The junior is available with a range up lamp types up to 150W and is suitable for use at low temperatures (-45°C).
