

# Lighting for industrial refrigeration

Sammode

# Lighting solutions for industrial refrigeration

Industrial refrigeration lighting requires special precautions, especially in the food processing industry. We offer luminaires that are ideal for cold storage rooms and other refrigerated areas. They offer five aspects guaranteeing the reliability of a long-term investment.

---

## Resistant to thermal and mechanical impacts even at very low temperature:

- Single-piece housing principle to absorb thermal expansion and mechanical stress
- Robust casing resisting IK10 mechanical impacts
- Resistance to vibrations according IEC 60068-2-6
- Robust power supply conceived for an intensive operation at low temperatures

---

## Designed to meet hygiene requirements in the food industry:

- Absolute and durable imperviousness IP68/IP69K
- Absence of frost formation
- High resistance to chemical detergent aggressions thanks to a coextruded polycarbonate and methacrylate housing

---

## Optimized to limit the consumption of your installation:

- Optical solutions conceived for each of your application to optimise the number of lights
- High efficient LED modules allowing to lower energy consumption related to lighting
- Compatible with detector cell use

---

## Assurance of a long-term commitment

With its experience in extreme environments, Sammode provides you with durable solutions up to 8 years warranty in intensive use, 24-hour/7-day.

---

## A partner at your side

- Diagnosis of your installation with regard to your constraints
- Definition of the best technical solution
- Lighting study to optimise your installation

Our sales and lighting design office teams are always available to answer your questions and help you identify the most appropriate product for your requirements.

---

# Lighting solutions dedicated to food process

## IFS, BRC and HACCP standards

The Sammode light fitting are designed to fulfill the requirements of the IFS, BRC and HACCP standards for lighting application in the process of certification:

- All work areas must be correctly illuminated.
- All lighting equipment must be protected by anti-burst protection and must be designed to minimise the risks of any breakage of glass.

## Security and easy cleaning

Our luminaires conception and the choice of materials enable our lighting solutions to resist to impacts, detergent factors and high pressure cleaning (IP69K).

They benefit from a unique envelop which resists impacts and chemical aggressions. The envelop is composed of a polycarbonate diffuser with an integrated coextruded PMMA layer.

The alliance of mechanical polycarbonate (IK10) characteristics and PMMA chemical resistance provides the ideal protection during cleaning and maintenance stages of your site.

This PMMA layer resists to detergent factors and complies with requirements for objects and materials made with plastic that are intended to be in touch with agri-food commodities (Europe : 2002/72/EC, 2004/19/EC, 2005/79/EC et 2007/19/EC).

# Easy implementation and maintenance

Fixing straps and plug system makes the light fitting easy to maintain outside the process zone:

- Facilitated maintenance (fast opening of the brackets and unpluggable power outlets) outside the process zone
- No loss of pieces

# Sustainable and maintainable luminaires

- As a designer and manufacturer, Sammode is fully committed to providing long-term, reliable solutions with durable and upgradable luminaires.
- Light sources, electronic circuit and mechanical structure: each component is designed to last and can be replaced.

# A complete range of lighting solutions for refrigeration industry

## **Blast freezing tunnels and deep freezing process zone: Bering 100**

- Weak volume and installation flexibility
- High resistance to impacts and vibrations
- Perfectly suitable for intensive cleaning processes
- 8-year guarantee in intensive use, 24-hour/7-day

## **Storage warehouses, cold rooms: Bering 133**

- Ideal for cold room general lighting up to 7 meters
- Large choice of powers and sizes of luminaires to optimise the number of lights and consumption.
- Up to 80% energy saving compare to a fluorescent solution and 100% of the luminous flux when switched on
- 8-year guarantee in intensive use, 24-hour/7-day

## **High heights, shelvings: Barents**

- Light output of 14 000 lumen
- Intensive linear lens
- 8-year guarantee in intensive use, 24-hour/7-day
- A powerful and efficient solution for lighting shelvings

Temperatures	Environments	Solutions
<b>General lighting</b>		
down to -40°C	Cold processes Deep-freezing	Bering 100
	Cold rooms Up to 7 meters	Bering 133
	Cold rooms Shelvings from 7 to 15 meters high	Barents 133
down to -60°C	Very low temperature areas	Celsius 70
<b>Emergency lighting</b>		
down to -20°C	Low temperature areas	Maxwell LSC
down to -60°C	Very low temperature areas	Maxwell LSC BT

# BARENTS

Technology	LED
Max. temp.	As low as -40°C
Light output	13700 lm
Beam	Elliptical
Height	7 to 15 m
Power supply	Industrial lighting

## Key features

- Plug & Play installation by disconnectable plug
- Suitable for use in industrial environments
- Optics suited to lighting high spaces with shelves and cold storage
- Durable and maintainable luminaire

## Options

Colour temperature	Code
5000 K	850
Finishings	
Stainless steel 316 L	MR

## Accessories

- Extension kit for APSAD compliance

## Photometry

## Specifications

Light output* (lm)	Designation	Code	P (W)	T (K)	L (mm)
13700	BAR133 16H840 POME PS3 BRS	3210 0020	115	4000	1850

## Specifications

Technical data	
Light source	High-efficiency LED modules Reinforced light output LED modules 70,000 h L80/B50 at max. operating temperature CRI > 80
Optics	High-intensity linear lens (elliptical) for lighting high spaces
Heat management	Aluminium heat sink
Control gear	Robust industrial-lighting electronic driver (non-dimmable) Resistance to voltage surge: 320 V AC, 48 h Supports voltage peaks < 4kV
Power supply	220-240 V 50/60 Hz and 176-280 V DC Compatible with central source
Electrical class	Class I
Operating temperature	-40°C to +25°C
Cable entry	Disconnectable plug for Ø 8 to 10 mm cable (3 × 1.5 mm²)
Fixing	2 reinforced stainless steel fixing straps with spring clip
Method of construction	One-piece housing with reinforced ingress protection Long-lasting ingress protection thanks to axial screw fitting
Materials	
Housing	Food industry polycarbonate housing protected by a coextruded PMMA layer
End caps, fixing straps	Stainless steel 304 L
Gaskets	Silicone
Standards	
Ingress protection	IP66, IP68 and IP69K
Shock resistance	IK10
Fire resistance	650°C
Vibration resistance	Meets the severe application requirements of standard EN 60598-1 (tested according to IEC 60068-2-6)

# BERING

Technology	LED
Temperature	As low as -40 °C
Light output	1850 to 11100 lm

## Key features

Plug & Play installation by disconnectable plug
Supports repeated on/off switching
Suited to lighting large areas
Durable and maintainable luminaire

## Options

Code Ø100mm Ø133mm

# Options and accessories

Simplifying the mounting, adapting and making an installation safe, Sammode offers all the options and accessories you need to complete the installation of the luminaire. Spare parts are available for all our luminaires.

Finishings	<b>316L marine grade stainless steel</b> <ul style="list-style-type: none"><li>• Luminaire external metal components in 316L stainless steel and screws in A4 stainless steel (in the basic option, these are 304L stainless steel, with screws in A2 stainless steel)</li><li>• Excellent resistance to corrosion by pitting, and specifically recommended for marine applications</li></ul>	Compatibility All tubular ranges	Code MR	
Accessories	<b>Raised 304L stainless steel strap fixings for ceiling mounting</b> <ul style="list-style-type: none"><li>• Kit of 2 raised 304L stainless steel strap fixings to ceiling-mount luminaires in accordance with the rules set out in technical document APSAP D14-A, i.e. a minimum distance of 20 cm between the equipment and the face of the sandwich panel.</li><li>• Strap fixing screws included</li></ul>	Compatibility All tubular ranges	Code PU44277	
	Stainless steel 316 L also available		PU47378	
	<b>Raised 304L stainless steel strap fixings for wall mounting</b> <ul style="list-style-type: none"><li>• Kit of 2 raised 304L stainless steel strap fixings to wall-mount luminaires in accordance with the rules set out in technical document APSAP D14-A, i.e. a minimum distance of 5 cm between the equipment and the face of the sandwich panel.</li><li>• Strap fixing screws included</li></ul>	Compatibility All tubular ranges	Code PU44278	
	Stainless steel 316 L also available		PU45880	
	<b>4-outlet IP68 junction box</b> <ul style="list-style-type: none"><li>• High-protection junction box for the connection of between 1 and 3 luminaires</li><li>• Capacities:<ul style="list-style-type: none"><li>– cable diam. 7 to 14 mm</li></ul></li><li>• Ingress protection: IP66/IP68</li><li>• Materials:<ul style="list-style-type: none"><li>– Casing: PA 66</li><li>– Cover trim: SEBS</li><li>– Seals: TPE</li></ul></li><li>• Service temperature: -40 °C to +125 °C</li><li>• Supplied with blanking plugs for unused outlets</li><li>• Connection terminal not included</li></ul>	Compatibility All tubular ranges except Celsius et Maxwell LSC BT ranges	Code CP00674
